

## IMPROVEMENTS TO THE 2020 EDITION OF TOUTILIX:

**CARDS:** Produced once more by the manufacturer France Cartes, which made the entire first edition in 2015. Ducale-quality cards. Smoother with better glide. Springier. 3 mm white border vs. 4 mm: fuller, more adult, for all ages. Brighter colors. Slightly bigger illustrations. Easier to read help cards. Firecrackers are better positioned in the corners.

**BOX:** Slightly bigger, but still a small format – a deliberate choice. Easier access to the cards, which is important for setting aside or removing cards depending on the game. Better visibility in shops. The “Cards made in France” logo on the front differentiates it from the 2018 version. The back of the box clearly shows the editorial line, the role each contributor plays, the game search engine on the website, and the relocation: “Made in Europe” for full transparency since the cards are made in France by France Cartes and the rest in Italy.

**RULEBOOK:** 4 extra pages. Illustrated. Colorful. Uncluttered visuals. Easier access to the full list of games. The search engine is highlighted. Presentation and definition of the Toutilix philosophy.

**WEBSITE:** Several videos including instructional videos. An essential complement to the box: access to each of the 40 rules using a clickable search engine. Downloadable rules: the rulebook from the box in PDF format, each individual game, and all 40 games. The presentation texts and images are updated according to the editorial line.
